

NOTICE: ROP MARCHE ERDF 2014-2020 – AXE 8 - ACTION 21.1 – AREA 21.1.1

Project co-financed by the European Union, the Italian State and the Marche Region.

The project aims to find new solutions in the field of industrialization and engineering of items dedicated to the furniture environments. With this purpose, the company has developed advanced technological solutions in the field of upholstery of furnishing accessories, has developed specific skills in the processing of materials using advanced prototyping techniques. Innovation has brought to the development of new products / services and high-quality accessory processes.

The investments involved are the following:

1. Computerized machinery for cutting leather and fabrics and for automatic gluing, connected to the assembly line, for the diversification of production through a new process and the creation of new items;
2. New production process with automatic cabin for electrostatic flocking.
3. Prototyping system using big sizes 3D printing.
4. Equipment related to the connection of the new production lines.
5. Software for the control and integrated management of production.
6. Services for the interconnection and development of models in a view of Industry 4.0 perspective.

Through this project Erreuno srl has achieved the following results:

- a. Increase in the variety of processes and materials in order to adapt to the changing on customer demand;
- b. Increased effectiveness in proposing new technical and aesthetic solutions;
- c. Reduction of defects and waste during production process and greater Quality control;
- d. Increase of efficiency along the supply chain;
- e. Reduction of order lead-time.

Financial support received from the EU is: € 161.360,50.

NOTICE: ROP MARCHE ERDF 2014-2020 - AXE 4 - AREA 12.1

Project co-financed by the European Union, the Italian State and the Marche Region.

The project of Erreuno srl aims at the introduction of actions that maximize the benefits in terms of energy saving through the use of renewable sources and in general of high efficiency technologies.

The goal is to promote energy efficiency by reducing energy consumption and polluting emissions into the atmosphere of Erreuno S.r.l.

The energy saving is 106.587 kgCO adopting an energy performance improvement plan in compliance with ISO 50001:2011 procedure.

Financial support received from the EU is: € 33.900,00.
